

KRISHNA YADAV

Machine Learning Intern

☎ +91-6386333833 ✉ krishna500yadav@gmail.com 🔗 [linkedin.com/in/krishna-yadav-63a0a5331](https://www.linkedin.com/in/krishna-yadav-63a0a5331)

Summary

Machine Learning Intern with hands-on experience in Python, SQL, Data Analysis, and predictive modeling. Skilled in data preprocessing, exploratory data analysis (EDA), feature engineering, and implementing machine learning algorithms using Scikit-Learn, Pandas, and NumPy. Familiar with Deep Learning fundamentals, TensorFlow basics, and data visualization tools. Strong analytical and problem solving abilities with experience building data-driven projects and working with real-world datasets.

Skills

Programming Languages: Python, SQL, C, C++

Machine Learning: Supervised & Unsupervised Learning, Regression, Classification, Clustering, Neural Networks

Tools & Libraries: Jupyter Notebook, Matplotlib, Seaborn, Git, MySQL Workbench, MS Excel

Technical Abilities: Feature Engineering, Model Evaluation, Exploratory Data Analysis (EDA), Data Preprocessing

Work Experience

Machine Learning Project Trainee

April 2026 – Present

Self-Directed / Academic

Tools Used: Jupyter Notebook, Git/GitHub, XGBoost

- **Supervised Learning Pipelines:** Engineered classification systems for loan and churn prediction; resolved Class Imbalance (80/20 split), resulting in a 15% increase in Recall and a peak F1-Score of 0.92.
- **Unsupervised Pattern Discovery:** Architected segmentation models for a dataset of 2,240+ customers; implemented PCA to reduce features from 22 to 5 while retaining 95% of data variance, significantly lowering computational latency.
- **Wrangling & Feature Engineering:** Enhanced Python scripts to automate cleaning for 10,000+ data points; addressed multicollinearity and performed One-Hot Encoding, improving model training speed by 25%.
- **Technology Stack:** Worked with an end-to-end stack including Scikit-Learn for modeling, Matplotlib/Seaborn for visualizing 90th-percentile outliers, and SQL for joining tables with 25,000+ rows.

Projects

SmartCart Clustering System | Python, K-Means, PCA

March 2026 – April 2026

- Implemented an Unsupervised Machine Learning model to segment a dataset of 2,240 customers into distinct behavioral clusters using the K-Means Clustering algorithm.
- Preprocessed 22 attributes including demographics and purchase frequency, applying Principal Component Analysis (PCA) for dimensionality reduction to optimize cluster separation.
- Utilized the Elbow Method and Silhouette Coefficient to determine the optimal number of clusters, ensuring high intra-cluster similarity and distinct segment definitions.
- Identified 4 key customer segments, providing actionable insights for personalized marketing strategies that target high-value users and improve retention rates.

CreditWise Loan System | Python, Logistic Regression, SQL

February 2026 – March 2026

- Built an end-to-end Supervised ML pipeline to predict loan approval status, utilizing binary classification techniques to improve decision-making accuracy.
- Executed and compared multiple algorithms including KNN, Logistic Regression, and Naive Bayes to identify the most robust model for the dataset.
- Conducted extensive Exploratory Data Analysis (EDA) and Feature Engineering to handle missing values and optimize input variables for model training.
- Evaluated model performance using industry-standard metrics including Precision, Recall, and F1-Score, ensuring a high level of predictive reliability.

Awards & Certifications

- Solved 200+ problems on LeetCode, GeeksforGeeks & Coding Ninjas
- HTML5 Certification – Infosys Springboard
- CSS3 Certification – Infosys Springboard
- JavaScript (Basic) Certification – HackerRank
- Programming Fundamentals with Python – Infosys Springboard

Education

B.Tech in Computer Science and Engineering

Expected July 2028

Pranveer Singh Institute of Technology, Kanpur

CGPA: 8.55

Intermediate

2023-24

Mantora Public School,(CBSE), Kanpur

84%

High School

2021-22

Mantora Public School,(CBSE), Kanpur

93.4%
